Initial design Ideas and development-

Our design is based on the original design of an aircraft. We have incorporated the original design of the wings, which have a double layered and have support structures in between. We have also taken inspiration of modern aircrafts in the way we've replicated our seats to look like an airplane's. We've also taken the bus times in consideration and made sure it was visible on both sides using glass/malleable plastic.

Prizes:

- The winning design or parts of the winning design could be chosen to be built!
- Work displayed at a Jersey Aero Club open day event
- 1 x 30 minute trial flight
- 1 x guided tour of the engineering department at the Jersey Aero Club
- 1 x junior membership to the Jersey
