

How do Planes Work?

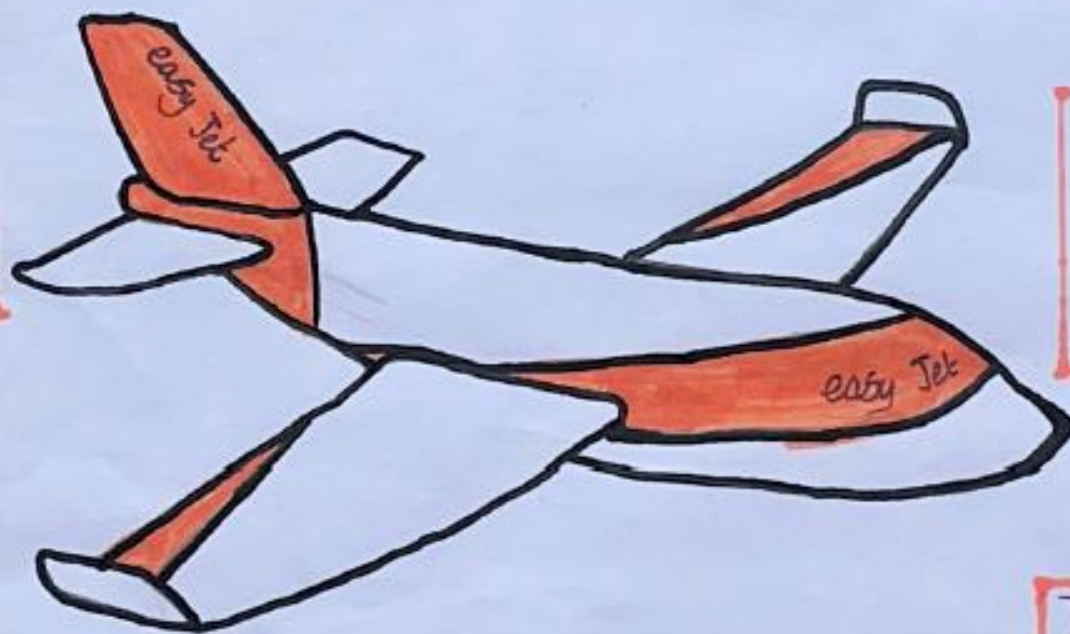

Fun facts

even know planes are metal they are bullet proof. and lighting might be scary when flying in a plane but lighting won't affect the plane

How do metal planes fly?

Airplane wings are shaped and tilted in such way that when air moves across the wings, an upward force is created on the wings

What I think the aero club is about

I think that the aero club is a place where people train to fly a plane and do a lots of stuff in Jersey

What I think the aero club is about

I think that in the Jersey Aero Club there is a variety of social events. also including flights, and training.

The Aero Club was formed in 1905 by Charles Jasper Glidden and Augustus Post.
